

Winter School on Machine Learning, WISMAL 2020
Lecture Program

Friday, January 10th

09:30 - 10:00	Welcome and registration
10:00 - 12:00	Consensus Learning <i>Xiaoyi Jiang, University of Muenster</i>
12:00 - 17:00	Break
17:00 - 19:00	Recurrent Neural Networks: From Universal Function Approximators to Big Data Tool <i>Danilo Mandic, Imperial College London</i>
19:15 - 20:30	Social event: Welcome cocktail at Museo Elder terrace bar

Saturday, January 11th

10:00 - 12:00	Multi-target prediction <i>Willem Waegeman, University of Gent</i>
12:00 - 15:00	Break
15:00 - 17:00	Prototype-based machine learning <i>Michael Biehl, University of Groningen</i>
17:00 - 17:30	Coffee break
17:30 - 19:30	Neural Network design in the Wolfram language <i>Markus van Almsick, Wolfram Research</i>

Sunday, January 12th

10:00 - 13:00	Convolutional Neural Networks and Deep Learning <i>María Leyva Vallina and Nicolai Petkov, University of Groningen</i>
13:00 - 17:00	Break
17:00 - 19:00	Clustering <i>Kerstin Bunte, University of Groningen</i>
